-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The disclosure is objected to because of the following informalities: on page 8, line 18, and page 8, line 1, the reference number "44" should be changed to -- 444 -- referring to the "second thread". Appropriate correction is required.

Claim Objections

3. Claims 11 and 12 are objected to because of the following informalities: the word "the" (claims 11 and 12, line 1) before "when" should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claimed language of the phrase "an elastic plate" (claim 1, line 9) is misleading because figure 1 clearly shows that a loop (50) instead of a plate. Moreover, the exact meaning of the phrase "the elastic plate has a mediate portion formed with a circle protruded outward from the guide seat" (claim 17) is not clearly understood as to how the "elastic plate" is "being formed of a circular".

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3652

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1,17, and 18, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Lammers (6,012,416).

Lammers (6,012,416) discloses a holder comprising a handle portion (14) and another extension portion (12), a threaded rod (52) mounted on the handle, a control unit, a guide seat (36) having a threaded hole (64) (Fig. 4), which can be considered as a clamping seat, and a polymeric loop (20) substantially mounted on the guide seat. Note that the control unit can be any member (such as members 30, spring 42, plate member 38) related to the handle and the threaded rod.

8. Claims 1,13, and 14, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Bowie (2,669,478).

Bowie (2,669,478) discloses a holder comprising a handle portion (40,44) and another extension portion (34), a threaded rod (30) mounted on the handle, a control unit, a housing (12) or a guide seat, and an elastic plate (18,26) mounted on the guide seat. Note that the elastic plates (18,18) extend through the guide seat when in a gripped position as shown in Fig. 2. The handle comprises a tube (40) having elongated slots (42,42), a sealing sleeve (54), and an adjustable knob (52) mounted on the sealing sleeve.

Allowable Subject Matter

9. Claims 2-12,15,16,19, and 20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Theodore (1,350,123) and Vesque, Sr. (3,534,993) show a handle assembly, a threaded rod, and a gripping jaw.
